

**Power Requirements**

**12v power supply**  
 Cut blue wire.  
 Connect green wire to V+.  
 Connect gray wire to V-.

**24v power supply**  
 Cut green wire.  
 Connect blue wire to V+.  
 Connect gray wire to V-.

1. Remove upper screws from keypad faceplate.
2. Cutout template (below) on dotted line.
3. Position template over faceplate (align screw holes on template with upper screw holes on keypad faceplate).
4. Insert upper screws through template onto keypad faceplate.
5. Drill a hole through circle marked with crosshairs using a 1/4" metal drill bit.
6. Remove faceplate from keypad, and remove metal fillings and debris inside of keypad.
7. Once keypad interior is free from debris, insert 3-conductor cable through drilled hole.
8. Mount the Lighting Kit, with the electronics components facing down.
